

AMENDED IN ASSEMBLY MARCH 26, 2015

CALIFORNIA LEGISLATURE—2015–16 REGULAR SESSION

ASSEMBLY BILL

No. 1045

**Introduced by Assembly Member Irwin
(Coauthor: Assembly Member Chiu)**

February 26, 2015

An act to add ~~Section~~ *Sections 42649.87 and 43032* to the Public Resources Code, relating to solid waste.

LEGISLATIVE COUNSEL'S DIGEST

AB 1045, as amended, Irwin. ~~Composting facilities: streamline permitting and regulation.~~ *Organic waste: composting.*

(1) The existing California Integrated Waste Management Act of 1989, which is administered by the Department of Resources Recycling and Recovery, establishes an integrated waste management program. Existing law requires each city, county, city and county, and regional agency, if any, to develop a source reduction and recycling element of an integrated waste management plan. Those entities are required to divert 50% of all solid waste through source reduction, recycling, and composting.

This bill would require the California Environmental Protection Agency, in coordination with the department, to develop and implement policies to aid in diverting 50% of organic waste from landfills by 2020 by promoting the composting of specified organic waste and by promoting the appropriate use of that compost throughout the state. The bill would require the agency to promote a goal of reducing at least 5 million metric tons of greenhouse gas emissions per year through the development and application of compost on working lands, and would authorize the agency to work with the Department of Food and

Agriculture to achieve this goal. The bill would also require the agency to convene the department, the State Water Resources Control Board, and the State Air Resources Board to ensure proper coordination of agency regulations and goals to implement these requirements.

~~Existing~~

(2) *Existing* law requires the Department of Resources Recycling and Recovery to adopt regulations relating to waste management, including standards for the design, operation, maintenance, and ultimate reuse of solid waste facilities, and for solid waste handling, transfer, composting, transformation, and disposal. Existing law prohibits the solid waste handling, transfer, composting, transformation, and disposal standards from including any requirement that is under the authority of the State Air Resources Board for the prevention of air pollution or the State Water Resources Control Board for the prevention of water pollution and prohibits the solid waste facilities standards from including aspects of solid waste handling and disposal that are within the jurisdiction of the State Air Resources Board, air pollution control districts, and air quality management districts, or the State Water Resources Control board or a regional water district.

Existing law prohibits a person from discharging a quantity of air contaminants or other material that causes injury, detriment, nuisance, or annoyance to the public, or that endangers the comfort, repose, health, or safety of the public, or that causes injury or damage to business or property, except as provided.

Under existing law, the Porter-Cologne Water Quality Control Act, the State Water Resources Control Board and the California regional water quality control boards are the principal state agencies with responsibility for the coordination and control of water quality in the state. The act, with certain exceptions, requires a waste discharger to file certain information with the appropriate regional board and to pay an annual fee.

This bill would require the Department of Resources Recycling and Recovery, in coordination with the State Air Resources Board and the State Water Resources Control Board, to develop a policy that promotes the development of streamlined permitting and regulation of composting facilities while protecting air and water quality.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.

The people of the State of California do enact as follows:

1 *SECTION 1. The Legislature finds and declares all of the*
2 *following:*

3 *(a) With the enactment of the California Integrated Waste*
4 *Management Act of 1989 (Division 30 (commencing with Section*
5 *40000) of the Public Resources Code), the Legislature declared*
6 *that the Department of Resources Recycling and Recovery and*
7 *local agencies shall promote composting.*

8 *(b) Since the enactment of the act, local governments and private*
9 *industries have worked jointly to create an extensive material*
10 *collection infrastructure and have implemented effective programs*
11 *to achieve a statewide diversion rate greater than 50 percent.*

12 *(c) Although California now leads the nation in waste reduction*
13 *and recycling, the state continues to dispose of more than 15*
14 *million tons of compostable organics each year in solid waste*
15 *landfills.*

16 *(d) Composting organic materials results in substantial*
17 *environmental and agricultural benefits, including the reduction*
18 *of naturally occurring volatile organic compounds and ammonia.*

19 *(e) The Economic and Technology Advancement Advisory*
20 *Committee, formed pursuant to the California Global Warming*
21 *Solutions Act of 2006 (Division 25.5 (commencing with Section*
22 *38500) of the Health and Safety Code), has identified composting*
23 *as a cost-effective technology for reducing greenhouse gas*
24 *emissions.*

25 *(f) The application of compost in agriculture and landscaping*
26 *has been shown to offer significant soil-carbon sequestration and*
27 *water quality benefits, provide erosion control, reduce the need*
28 *for synthetic fertilizers and pesticides, and conserve water and*
29 *irrigation-associated energy.*

30 *(g) In 2007, the department's predecessor agency adopted*
31 *Strategic Directive 6.1 to reduce the amount of organics in the*
32 *waste stream by 50 percent by the year 2020.*

33 *(h) In 2014, the state required organic waste generators that*
34 *produce four cubic yards or more of organic waste a week to*
35 *arrange to recycle this material (Chapter 12.9 (commencing with*
36 *Section 42649.8) of the Public Resources Code).*

37 *(i) To reduce the amount of organics in landfills, the state must*
38 *promote the development and permitting of composting facilities*

1 *and ensure that state regulations account for the lifecycle emissions*
2 *reduction and water quality benefits of diverting organic waste*
3 *from landfills and into compost facilities, while continuing to*
4 *protect air and water quality.*

5 *SEC. 2. Section 42649.87 is added to the Public Resources*
6 *Code, to read:*

7 *42649.87. (a) The California Environmental Protection*
8 *Agency, in coordination with the department, shall develop and*
9 *implement policies to aid in diverting 50 percent of organic waste*
10 *from landfills by 2020 by promoting the use of agricultural,*
11 *forestry, and urban organic waste as a feedstock for compost and*
12 *by promoting the appropriate use of that compost throughout the*
13 *state.*

14 *(b) In developing policies pursuant to subdivision (a), the*
15 *California Environmental Protection Agency shall promote a goal*
16 *of reducing at least five million metric tons of greenhouse gas*
17 *emissions per year through the development and application of*
18 *compost on working lands, which includes, but is not limited to,*
19 *agricultural land, land used for forestry, and rangeland. The*
20 *California Environmental Protection Agency may work with the*
21 *Department of Food and Agriculture to achieve this goal.*

22 *(c) The California Environmental Protection Agency shall*
23 *convene the department, the State Water Resources Control Board,*
24 *and the State Air Resources Board to ensure proper coordination*
25 *of agency regulations and goals to implement this section.*

26 **SECTION 1.**

27 *SEC. 3. Section 43032 is added to the Public Resources Code,*
28 *to read:*

29 *43032. The Department of Resources Recycling and Recovery,*
30 *in coordination with the State Air Resources Board and the State*
31 *Water Resources Control Board, shall develop a policy that*
32 *promotes the development of streamlined permitting and regulation*
33 *of composting facilities while protecting air and water quality.*
